

Tastemaker interView

For our inaugural tastemaker interView series, we invited Christine Chan Chiu, art advisor and Co-Founder of [AARRTT](#), an online platform that connects audiences to the best art happenings in Asia, to share her love for Asian designs and tips on decorating an art-filled space.

Read the interview and shop Christine's Vermillion favorites below.

Christine's Favorites

Christine's inspiration:

Always the first to be in the know of all the art happenings around the world, Christine's latest creative inspirations range from this year's internationally acclaimed Venice Biennale to the newly opened sculptural roof garden of the local M+ museum in Hong Kong.

On Asian philosophy she's drawn to:

"I love the Japanese philosophy of wabi-sabi. Aesthetically, this means we can appreciate objects that are not perfectly balanced, with juxtapositions of different materials and textures. I find that very interesting and inspiring."

On her favorite Vermillion creator:

"It would be [SUGO](#). Kevin is a friend of mine, but beyond that his lighting sculptures are really making a mark in the art world. I'm specifically thinking about [Foglia](#), the leaf-shaped floor lamp. It serves as a lighting piece but it's also beautiful as a sculpture itself. It also purifies the air when it's lit - truly multi-functional!"
